Immigration and Less-Educated American Workers

Jason Richwine

September 26, 2016
Figure 1. The percentage of prime-age men neither working nor looking for work has risen steadily over the last half century.

For native-born prime-age men, labor-force dropout has been most common among the least skilled.

“Prime age” is 25 to 54.
Information on immigration status is not available prior to 1994.
Prime-age male immigrants of all education levels have stayed in the labor force.

“Prime age” is 25 to 54.

Information on immigration status is not available prior to 1994.
When prime-age men are divided into consistently-sized skill groups across years, the less-skilled groups show more labor-force dropout over time.

“Prime age” is 25 to 54.

“Natives” are non-Hispanic whites and blacks.
In the two lowest skill quintiles, labor-force dropout has increased for natives but not for immigrants.

Source: March Supplement of the Current Population Survey. March Data are limited to men ages 25 to 54.

**Source:** American Time Use Survey.  
“Equivalent full-time weeks” are average hours worked per year divided by 40. “Prime age” is 25 to 54. For sample sizes, see Table A1. C.I. = confidence interval.
Figure 3. Work time by lower-skilled native men has declined significantly since 2003...

Source: American Time Use Survey. Data are limited to “prime age” of 25 to 54. The category “some college” has been omitted for readability. “Equivalent full-time weeks” are average hours worked per year divided by 40. For more information, see Table A3 and Table A4.
Figure 4. ...while work time by immigrant men has remained high.

Source: American Time Use Survey. Data are limited to "prime age" of 25 to 54. The category "some college" has been omitted for readability. "Equivalent full-time weeks" are average hours worked per year divided by 40. For more information, see Table A3 and Table A4.
Figure 5. Natives are slightly more than half of the nation’s high school dropouts, but their share of the labor performed by all dropouts has declined to 40 percent.

- 2003-2005: 56% Native, 50% Labor
- 2006-2008: 53% Native, 48% Labor
- 2009-2011: 53% Native, 40% Labor
- 2012-2015: 52% Native, 40% Labor
