Performance Performance

The statistics in the above chart report E-Verify case processing results through Fiscal Year Q4 2017 (October 2016 – October 2017). All figures are expressed as a percentage of the total number of cases submitted and percentages are rounded. Total E-Verify Cases: 34,853,666. Cases Not Found Work Authorized: 329,620.

Most employees are automatically confirmed as work authorized.

- 98.91 percent of employees are automatically confirmed as authorized to work ("work authorized") either instantly or within 24 hours, requiring no employee or employer action
- 1.09 percent of employees receive initial system mismatches.

Of the 1.09% of employees who receive initial system mismatches:

- 0.15 percent are later confirmed as work authorized after contesting and resolving the mismatch.
- 0.95 percent are not found work authorized.

Of the 0.95% of employees not found to be work authorized:

- 0.61 percent of employees who receive initial mismatches do not contest the mismatch either because they do not choose to or are unaware of the opportunity to contest and as a result are found work authorized.
- 0.01 percent of employees who receive initial mismatches contest the mismatch and are not found work authorized.
- 0.32 percent of employees with initial mismatches are unresolved because the employer closed the case as "self-terminated" or as requiring further action by either the employer or employee at the end of FY17.

Percentage may not appear to sum based on rounding.
